

MiniCloud solution

Simple and secure access control

prima

Prima MiniCloud solution

MiniCloud is a simple, intuitive and secure system for small businesses or private homes that need simple and managed access control. With offline devices and cloud access, you can quickly and easily build a flexible and scalable system. Easy operation with a USB reader and complete control of the access rights will simplify your daily routines.

Benefits

- Lower investment without cabling - 10 minutes effort without drilling to replace existing lock with electronic access control
- Easy remote management of users without a need of visiting remote site for access rights update
- Straightforward recovery from cloud configuration in case of hardware replacement
- Immediate user blacklisting and events transfer with administration cards or smartphones
- Regular security checks, remote support maintenance and free online upgrades
- A perfect combination of convenient Data-on-Card technology and secure MIFARE DESfire/smartphone Bluetooth

Smart offline devices

- SensoLock®, a complete electronic cylinder solution
- EvoLock®, comfortable and intelligent digital handle
- LockerLock, for electronic control of your lockers
- Padlock, smooth solution for demanding conditions
- 1-door controller, where a partially wired system is essential, e.g. for barriers or sliding doors
