

# EvoLock®

Smart and comfortable digital handle

*prima*

# Modern design and effortless fitting

EvoLock® is a smart and elegant offline electronic door handle with an integrated RFID reader. It is a perfect solution, when wiring is not possible or when the building is part of cultural heritage and modifications are strictly controlled. For higher security, functionality can easily be upgraded to online operation via wireless network. No matter what type of doors you have, EvoLock® can be used for glass, wooden, plastic or tubular frame door.

## Advantages of EvoLock®

- Timeless stainless steel design with wide range of variants
- Suitable for DIN-profile cylinders and emergency exit locks (DIN EN 179) without drilling or cabling
- Available in weatherproof (IP66), fire or smoke resistant (DIN EN 1634) versions
- LED signal and battery integrated in the handle's reader
- Long battery life for up to 2 years or more with wake-up function
- Automatic unlocking and toggle function
- Compliant with DIN EN 16867 and DIN EN 1906
