

Integration

Use our access control solutions with your favorite ecosystem

prima

Joining your eco-systems into one masterpiece

Prima enables you to connect different platforms to work together seamlessly. You can fully control every door from your favorite software using web hooks – integration can be done as easily with a few mouse clicks.

Benefits

Use Microsoft **Active Directory** for managing physical access control for your organization. Boost user-friendly experiences when using **intrusion alarm** systems or **video surveillance** enriched with access control events and cardholder data.

Home and building automation

Integrate access control to your building management software with a simple web hook triggering custom scenarios, use **KNX** datagram or **MQTT** and **BACnet** protocol for most demanding projects, whatever fits you best.

Adapt to a customer special needs

Use powerful Python **Scripting** running on the controller to support any specific integrations. Also, it can act as a programmable logic controller giving you the ability to refine and tailor specific requirements.

Your OEM partner for access control

If your product range needs a professional access control solution, we have a full range of solutions. Convenient software and reliable hardware with on-board software is ready to integrate via **XML API** or other interfaces into your branded product portfolio.
