

Nova 3.0

The latest release of Nova 10/100/Server/Cloud

prima

Nova 3.0

Complete access control portfolio needs great software. Regardless of whether the need is for standard access control or the need for reservations, parking, elevators, apartments, hotel rooms, building management, visualization, card design or visitors, the Nova software provides an optimal cyber secured solution.

Benefits

- Up to 100 doors without servers, no time lost for software installation or external database installation
- Cyber secured with encryption at all entities, Grade 4 certified
- High reliability with redundancy
- Integrated solutions in one software with interfaces to be easily integrated into third party applications with MQTT, XML API, KNX, BACNet
- Future proof with remote upgrade of centrals and readers
- GDPR compliant with settings according to your needs
- Email or app notifications for immediate actions in case of disruptions
- Flexible scalability with various software packages and extensions
