

Parking solutions

Carefree access to the parking lot

prima

Complete parking control

Providing a sufficient number of parking spaces for employees and the convenience of managing the parking lot can be a big challenge. Prima's parking system allows easy integration of all challenging factors, so that parking will be completely trouble-free. The multitude of available devices and identification media provides you with solutions for all situations.

Choose the most suitable technology

- **Alpha Parking central:** It enables the counting of vehicles in individual zones, traffic light control, preset scenarios and the creation of custom scenarios
- **Nexus reader:** Future proof RFID readers supporting smartphones, cards, tags or PIN
- **Long distance remote control:** Simple click on button allows you comfortable access to parking areas with copy protected remote transmitter
- **UHF reader:** Where security, fast operating and hands-free operation is crucial
- **License Plate Camera:** Convenient remote opening with intelligent number plate recognition with adjustable smart parameters when reading is not optimal
- **GSM Gateway:** Reliable remote gate opening with a simple call to a specific number
