

SensoLock®

A versatile electronic door lock

prima

Round, smart and secure!

SensoLock® is a smart and elegant offline electronic knob with an integrated RFID reader. It is a perfect solution, when wiring is not possible or when the building is part of cultural heritage and modifications are strictly controlled. For higher security, functionality can easily be upgraded to online operation via wireless network. It is the ideal solution for apartment doors with high tenant turnover and the resulting higher risk of lost keys.

Advantages of SensoLock®

- Minimal installation costs because of euro profile cylinder compatibility
- Integrated LED and buzzer signals in the cylinder knob
- Long battery life for up to 2 years or more with wake-up function
- Available in weatherproof (IP66), fire or smoke resistant (DIN EN 1634) versions, half cylinder versions, anti-panic versions and fire resistant doors (T90) versions
- Fully compatibility with FlexAir® concept
- Compliant with DIN EN 15684
