

Padlock with SensoLock®

The perfect solution for securing remote sites

prima

Secure, economic and reusable!

Prima's padlock is the perfect solution for distant passages, where secure electronic access control is crucial. It provides a flexible and future-proof solution even for areas where the use of conventional access control is not possible. The padlock with SensoLock® is administered through the Nova software and it is part of FlexAir® access control system with other offline and online readers in a building.

Advantages of the padlock

- Available as offline reader or wireless online reader
- Use as a normal mechanical padlock, but much more secure due to the use of the highest security technologies
- Reset of the individual access rights in case of lost access tags or cards
- Restriction of rights according to certain timeframes
- Vandal shield included
- Suitable both for indoor and outdoor solution, such as power stations, telecom service, bike sheds, containers and construction sites
